SP LABORATORIJA AD BEČEJ	LIST OF ACTIVITIES CONDUCTED UNDER THE FLEXIBLE SCOPE OF ACCREDITATION	LFO 001
Accreditation number: 01-018		Edition 24 From 10.01.2018.

Short description of the changes from the previous edition of the List of activities conducted under the flexible scope of accreditation - Testing of genetic modification (marked in gray):

- 1) extension of the measured characteristic
- 2) changes of technique
- 3) changes of method
- 4) technical changes

Chronology of change:

From 22/01/2016 List of activities under the flexible scope of accreditation is extended with four genetic modification: CV 127, MON87705, MON87708, MON87769.

On 11/01/2017 technical changes are introduced in the name of measured characteristics Terminator T-nos, GTS 40-3-2 RoundUp Ready, MON89788, DP-356043-5, DP-305423-1, CV127

From 05/05/2017 List of activities conducted under the flexible scope of accreditation is extended with genetic modification FG72.

From 28/08/2017 List of activities conducted under the flexible scope of accreditation is extended with genetic element P-FMV.

Person responsible for the control of method "Testing of genetic modification" : MS Gordana Nović

SP LABORATORIJA AD BEČEJ	LIST OF ACTIVITIES CONDUCTED UNDER THE FLEXIBLE SCOPE OF ACCREDITATION	LFO 001
Accreditation number: 01-018		Edition 24 From 10.01.2018.

Short description of the changes from the previous edition of the List of activities conducted under the flexible scope of accreditation - Determination of pesticides residues (marked in gray):

- 1) extension of the measured characteristic
- 2) changes of technique
- 3) changes of method
- 4) technical changes

Chronology of change:

From 26/02/2016 List of activities conducted under the flexible scope of accreditation is extended with eight new pesticide residues (AMPA, Ethephone, Glyphosate, Omethoate, Orthophenylphenol (2-Phenylphenol), Piperonyl-butoxide, Phenmedipham, Tricyclazole), technique of determining is changed for nine pesticide residues and for 244 pesticide residues determining is extended with new detector (MS/MS).

From 25/4/2016 List of activities conducted under the flexible scope of accreditation is changed in the part of sample preparation according to SRPS EN 15662 for pesticide residues on GC/ECD and method SRPS EN 15741 is replaced with SRPS EN 15662.

From 20/05/2016. List of activities conducted under the flexible scope of accreditation is extended with 20 new pesticide residues (Biphenyl, Chlorantranilprole, Chlormequat, Cycloxydim, Demeton-S-methyl-sulphone, Dicrotophos, Dodine, EPN, Ethirimol, Fluopyram, Isocarbophos, Isoprocarb, Mandipropamid, Mepiquat, Metaflumizone, Metobromuron, Metosulam, Nitenpyram, Trinexapac-ethyl, Vamidothion).

From 08.06.2016. List of activities conducted under the flexible scope of accreditation is extended with pesticide residue Nitrofen in food and animal feed (from animal origin).

On 11.01.2017 technical changes are introduced into the name of method QuPPE.

From 24.03.2017 List of activities conducted under the flexible scope of accreditation is extended with pesticide residue Promecarb in potato.

From 24.04.2017 List of activities conducted under the flexible scope of accreditation is extended with 17 new pesticide residues (Bifenazate, Chlorthiamid, Isoprothiolan, Ametoctradin, Amitrole, Dinotefuran, Diquat, Emamectin benzoate (B1a and B1b), Flubendiamide, Furfural, Glufosinate-ammonium, Imazamox, Lufenuron, Maleic hydrazide, Paraquat, Spinetoram and Spirotetramat).

From 05.05.2017 List of activities conducted under the flexible scope of accreditation is extended in field of application and measurement range for 2 pesticide residues (Demeton-S-methylsulphone and Omethoate) and with 3 new pesticide residues (Fosethyl-AI, Cadusafos and Fensulfothion).

From 14.06.2017 List of activities conducted under the flexible scope of accreditation is extended with 3 new pesticide residues (Fenbutatin oxide, Sulfosulfuron, Pyriminobac-methyl).

From 23.06.2017 List of activities conducted under the flexible scope of accreditation is extended with pesticide residue Prothioconazole in lemon.

SP LABORATORIJA AD BEČEJ	LIST OF ACTIVITIES CONDUCTED UNDER THE FLEXIBLE SCOPE OF ACCREDITATION	LFO 001
Accreditation number: 01-018		Edition 24 From 10.01.2018.

From 31.07.2017 List of activities conducted under the flexible scope of accreditation is extended with 2 new pesticide residues (Cyhexatin i Azadirachtin).

From 08.08.2017 List of activities conducted under the flexible scope of accreditation is extended with determining the active substance Diquat in vegetable oil.

From 15.08.2017. List of activities conducted under the flexible scope of accreditation is extended with determining the active substance Fipronil in food from animal origin.

From 09.10.2017. List of activities conducted under the flexible scope of accreditation is extended with determining the active substance Azocyclotin in pome fruit.

On 13.10.2017 technical changes are introduced in the part of the test subject in order to group the name of products.

From 24.10.2017. List of activities conducted under the flexible scope of accreditation is extended with 2 new pesticide residues (Fipronil-sulphone and Nicotine).

On 10.01.2018. technical changes are introduced in the name of measured characteristics and method of testings.

Person responsible for the control of method "Determination of pesticide residues": MS Biljana Marošanić, spec. in tox.chem.

This list refers to the flexible part of the scope of accreditation, which is available on the website www.ats.rs
